

**Title:** To interface 5 LED's with Arduino and write a program to blink 5 LEDs, one at a time, in a back and forth formation.

**Aim:** To blink 5 LEDs, one at a time, in a back and forth formation.

**Circuits:**

**Code:**

```
int bright = 0;
void setup()
{
  pinMode(13, OUTPUT);
}

void loop()
{
  for(bright = 0 ; bright <= 255; bright+=2){
    digitalWrite(13,HIGH);
```

```

}
delay(150);
for(bright = 255 ; bright >= 0; bright-=2){
    digitalWrite(13,LOW);
}
delay(50);
}

```

### Running Circuit:

### Conclusion:

Here we Learn To Blink the 5 LED's at One By One.
